NON-TECHNICAL DOCUMENTATION

Product & Service Guide

A clear introduction to the Lumina shopping experience and the Lumi AI product specialist.

VERSION 1.0

LUMINA COMMERCE, INC.

PRODUCT AND SERVICE GUIDE

Welcome to Lumina

Lumina is a digital technology store built around a simple promise: help people choose confidently. The storefront combines a curated catalog, a complete shopping journey and Lumi, a conversational product specialist that explains options in clear language.

Customers can browse by category, compare products, add items to a cart, complete a guided checkout and receive an order confirmation. Lumi remains available throughout the experience to answer questions about products, shipping, returns, warranty and payments.

A better technology purchase is not about showing more options. It is about making the right option easier to understand.

24/7
GUIDED DISCOVERY
Lumi is available throughout the store

What customers can do

Discover

Explore selected products by category, use case, promotion or a direct search.

Understand

Open detailed product views with benefits, pricing, installments, warranty and return information.

Decide

Ask Lumi for tailored recommendations, comparisons and transparent trade-offs.

Purchase

Use a complete cart and checkout flow with delivery, payment and confirmation stages.

FROM DISCOVERY TO CONFIRMATION

The shopping journey

1. Arrive and explore

The home page introduces the current collection, featured categories and community favorites. Product photography and concise copy make the assortment easy to scan.

2. Narrow the choice

Customers can search by product name, category or description. Category controls highlight audio, wearables, smart home, workspace and accessories.

3. Ask Lumi

Lumi can translate a need into a recommendation, compare options, explain store policies and propose useful follow-up questions. Answers include consulted source material when applicable.

4. Build the cart

Items can be added from product cards or detailed views. The cart tracks quantity, subtotal, shipping eligibility and the path to checkout.

5. Complete checkout

The checkout collects delivery details, presents card and Pix options and shows an order summary. The current release demonstrates the full user experience with simulated payment approval rather than a live payment processor.

6. Receive confirmation

A successful order receives an order code, delivery estimate, payment status and confirmation message.

CONVERSATIONAL PRODUCT GUIDANCE

Meet Lumi

Lumi is designed to feel like a thoughtful in-store specialist: warm, concise and focused on the customer's actual need. The assistant does not simply generate generic sales copy. It searches Lumina's approved knowledge and responds with grounded information.

Product matching

Recommend products for a budget, routine, gift or specific use case.

Clear comparisons

Explain meaningful differences such as battery life, portability and intended use.

Policy support

Answer questions about shipping, returns, warranty and supported payment methods.

Guided follow-ups

Offer the next most useful questions so customers can continue naturally.

Visible sources

Show the Lumina source used for a factual answer.

Safe uncertainty

Decline to invent facts when approved information is missing.

Good questions to ask Lumi

- I need headphones for travel and calls. What should I choose?
- Compare Aurora and Nimbus for battery life and portability.
- Can I return an online order after delivery?
- Which products work well for a home office under R$1,000?
- What is covered by the Lumina warranty?

TRUST, PRIVACY AND SUPPORT

Service standards

Lumina presents policy and product facts from approved company documents. The assistant is instructed not to invent price, inventory, delivery estimates, compatibility or order status.

Commitment	What it means for customers
Grounded answers	Lumi uses approved Lumina knowledge and displays supporting sources.
Privacy by design	The assistant does not request passwords, authentication tokens or full identity documents.
Protected checkout	Payment fields are presented in a secure flow; the current demonstration does not process a real charge.
Transparent limits	When evidence is insufficient, Lumi says so and proposes a safer next step.
Accessible language	The storefront is English-first and can switch to Brazilian Portuguese or Latin American Spanish.

Returns and warranty at a glance

- Online purchases can be returned within seven calendar days of delivery, subject to the published return conditions.
- Products include a 12-month contractual warranty for manufacturing and material defects under normal use.
- Orders above R$499 qualify for free standard shipping in the current store policy.
- Exact delivery estimates are shown during checkout after the delivery destination is provided.

CUSTOMER REFERENCE

Frequently asked questions

Is Lumina available in multiple languages?

Yes. English is the default, with Brazilian Portuguese and Latin American Spanish available from the header.

Does Lumi know my cart?

Lumi receives a limited cart summary so it can make relevant suggestions without needing payment data.

Are Lumi's answers always generated by AI?

Production can use an OpenAI language model. If the model is unavailable, Lumina falls back to a controlled local response grounded in the same knowledge base.

Does the site charge a real card?

No. The current checkout demonstrates a complete purchase experience but uses a simulated payment confirmation.

Where can I use Lumina?

The production storefront is available at https://lumina-smart-store.vercel.app.

What happens when Lumi does not know?

It abstains rather than inventing an answer, then suggests a supported topic or a refined question.

Lumina brings the clarity of a specialist into every step of digital commerce.
